

SDAO-DMS

*Paperless Document Management System for the Student Development and Activities
Office*

Integration Test Documentation

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-01	User / Access Type	SDAO Admin
Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	• SDAO admin account exists and is verified • At least one document is pending review • Database connected		
Verification Steps	• Login to the SDAO admin account • View the dashboard • Open the review queue • Approve or return a pending document • Check the notification bell • Open the document archive • Print a document • Logout		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Login / Logout	Enter valid credentials and logout	Logged in and logged out without errors	Logged in and logged out successfully	PASSED
Dashboard & Overview	View system statistics and charts	Dashboard displays accurate statistics and status distribution	Displayed correctly	PASSED
Document Review Queue	Open a pending document and take action	Document advances or returns correctly, notification sent	Advanced correctly, notification sent	PASSED
Notification Bell	Open the bell and click a notification	Notification opens the correct document, badge updates	Opened correctly, badge updated	PASSED
Document Archive	Filter and open a terminal document	Full history displayed	Displayed correctly	PASSED

Printable Forms	Download a document as PDF	PDF matches the official paper form	Matched correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-02	User / Access Type	Organization Officer (President / Secretary)
Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	- Officer account verified with a school email - Organization already registered		
Verification Steps	- Login - Submit a new document - Upload required attachments - Track document status - Respond to a returned document - Logout		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Login / Logout	Enter valid officer credentials and logout	Logged in and logged out without errors	Logged in and logged out successfully	PASSED
Document Submission	Complete and submit an activity proposal with attachments	Document submitted, routed to the first approver	Submitted and routed correctly	PASSED

Attachment Upload	Attach required files to each slot	Files attached, slots marked complete	Attached correctly	PASSED
Document Status Tracking	View own organization's document list	Current stage and status shown accurately	Shown accurately	PASSED
Resubmission After Return	Edit flagged sections and resubmit	Document re enters the chain at the correct step	Re entered correctly	PASSED
Notifications	Receive email and in app notification on status change	Both notifications received	Received correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-03	User / Access Type	Faculty Adviser
Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	- Adviser assigned to at least one organization - A document from that organization is awaiting the adviser's step		
Verification Steps	- Login - Open the pending document - Review sections - Flag a section with a comment - Approve or return - Logout		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
---------	---------------------	------------------	----------------	---------

Login / Logout	Enter valid adviser credentials and logout	Logged in and logged out without errors	Logged in and logged out successfully	PASSED
Officer Search	Search for an organization's officers	Correct officers returned, clear message shown if none found	Returned correctly	PASSED
Section Flagging	Flag a specific section with a comment	Comment attached to that section only	Attached correctly	PASSED
Approve / Return Action	Approve or return the document	Document advances or returns to the officer correctly	Advanced or returned correctly	PASSED
Document History	View the document's full history for its own organization	History correctly scoped to own organization	Scoped correctly	PASSED

VIRAY, RANUEL GLENN L.

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-04	User / Access Type	Program Chair, Dean, or Principal
Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	• A document has reached this approver's step (regular chain uses Program Chair then Dean, SHS chain uses Principal)		
Verification Steps	• Login • Open the document at the current step • Approve, reject, or return • Logout		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Login / Logout	Enter valid credentials and logout	Logged in and logged out without errors	Logged in and logged out successfully	PASSED
Chain Step Access Control	Attempt to act on a document not yet at this user's step	Action blocked	Blocked correctly	PASSED
Regular Chain Approval	Approve as Program Chair, then as Dean	Document advances through both steps in order	Advanced correctly	PASSED
SHS Chain Approval	Approve as Principal	Document skips the Program Chair and Dean steps	Skipped correctly	PASSED
Notification on Hand Off	Next approver notified after this step	Notification sent	Sent correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-05	User / Access Type	Student Member (Non Officer)
Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	Student belongs to an organization but holds no officer role		

Verification Steps	• Login • View own organization's document status • Attempt to edit a document • View the public calendar • Logout
---------------------------	--

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Login / Logout	Enter valid credentials and logout	Logged in and logged out without errors	Logged in and logged out successfully	PASSED
Document Status View	View current stage of own organization's documents	Status shown, read only	Shown correctly, no edit access	PASSED
Edit Attempt	Attempt to edit or resubmit a document	Action blocked, editing reserved for president and secretary	Blocked correctly	PASSED
Public Calendar View	View upcoming approved activities	Only approved activities shown, no draft or pending items	Shown correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-06	User / Access Type	New Applicant (Student or Staff)
Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	• Applicant has access to a valid NU Lipa school email inbox		

Verification Steps	• Fill out the registration form • Submit • Receive the OTP email • Enter the code • Confirm account created • Login with the new account
---------------------------	--

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Registration Form	Submit school email, student ID, and password	Form validated, OTP email triggered	Validated and triggered correctly	PASSED
Domain Validation	System checks the email domain immediately on submission	Only recognized NU Lipa domains accepted	Validated correctly	PASSED
OTP Delivery	Email with six digit code sent via the configured mailer	Code received within the expected time	Received correctly	PASSED
Code Verification	Enter the code before expiry	Account created only at this point, not before	Account created correctly	PASSED
First Login	Login using the newly created account	Redirected to the correct role based dashboard	Redirected correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-07	User / Access Type	Multiple Roles (Officer, Adviser, Program Chair or Dean or Principal, SDAO Admin)

Date Tested	09/18/26	Type of System	Web Application
Pre-conditions	• All roles have active accounts • Test document not yet submitted		
Verification Steps	• Officer submits document • Each approver in the chain reviews and approves in turn • Final approval triggers notification • SDAO admin views the completed document in the archive		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Document Submission	Officer submits a complete document	Document enters the correct approval chain at step one	Entered correctly	PASSED
Sequential Chain Approval	Each approver approves in the configured order	Document advances one step at a time, correct approver each time	Advanced correctly	PASSED
Final Approval Notification	Last approver in the chain approves	Officer receives an outcome email and in app notification	Notification sent correctly	PASSED
Dashboard Reflection	SDAO admin refreshes the dashboard	Newly approved document reflected in status distribution	Reflected correctly	PASSED
Archive Entry	SDAO admin opens the document archive	Approved document appears with full transition history	Appears correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-08	User / Access Type	Authorized Activity Proposal Approver
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Mobile API is reachable; authorized and unauthorized accounts exist; secure device storage is available.		
Verification Steps	Open the mobile app; sign in with an authorized approver; restart the app; call an authenticated endpoint; sign out; repeat with a user without mobile approver access.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Mobile Login and API	Submit valid approver credentials to the mobile login endpoint	API returns a token and user endpoint returns the authorized approver	Token and authorized user returned correctly	PASSED
Mobile Access Control	Sign in using an account without mobile approver permission	Access is denied and no usable mobile session remains	Unauthorized mobile access blocked correctly	PASSED
Secure Token Storage	Restart the app after successful login	SecureStore token restores the authenticated user session	Session restored correctly	PASSED
Authenticated API Requests	Load an approver endpoint after login	Request includes the mobile Bearer token and receives authorized data	Authenticated request completed correctly	PASSED
Mobile Logout	Sign out from the Profile screen	Server logout is requested and the local token is cleared	Server and local session cleared correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-09	User / Access Type	Assigned Activity Proposal Approver
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Approver is signed in; several proposals exist, including assigned, unassigned, and non-actionable records.		
Verification Steps	Open Home; compare summary with API data; open Queue; refresh; select an assigned proposal; compare all displayed fields and permissions with the server response.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Review Queue API	Request /documents/queue from the mobile app	API returns proposals visible to the authenticated approver	Queue records returned correctly	PASSED
Actionable Queue Filter	Display the returned queue on Home and Queue	Only records with can_act permission are presented for review	Actionable records filtered correctly	PASSED
Dashboard Summary	Compare awaiting-review count and oldest date with queue data	Summary values match the current actionable queue	Summary matched queue data	PASSED
Proposal Detail API	Open an assigned Activity Proposal	Mobile app retrieves and displays the correct proposal, workflow stage, permissions, and history	Proposal details displayed correctly	PASSED
Pull-to-Refresh	Change assignment data on the web system, then refresh the mobile queue	Updated assignment and counts appear without restarting the app	Updated data synchronized correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-10	User / Access Type	Assigned Approver with Workflow Action Permission
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Activity Proposals are available at the current approver step with approve, revision, and reject permissions as applicable.		
Verification Steps	Open each assigned proposal in mobile; approve one; return one with remarks and section notes; reject one with a reason; verify each result in the web system and next approver queue.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Mobile Approval	Confirm approval for a proposal at the current step	API accepts the action and advances the proposal to the next step or final approval	Proposal advanced correctly	PASSED
Revision Request	Submit general remarks, selected sections, and section-specific notes	API stores the revision details and returns the proposal to the correct owner	Revision request recorded correctly	PASSED
Mobile Rejection	Confirm rejection with a mandatory reason	API marks the proposal rejected and preserves the reason	Proposal rejected correctly	PASSED
Web System Reflection	Open each acted-on proposal in the web application	Status, workflow history, remarks, and acting approver match the mobile action	Mobile actions reflected correctly on web	PASSED
Queue and Notification Hand-off	Refresh current and next approver views after an action	Item leaves the old actionable queue and the	Queue and notification hand-off completed correctly	PASSED

		correct recipient receives the workflow notification

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-11	User / Access Type	Assigned Activity Proposal Approver
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Assigned proposal contains valid PDF and non-PDF attachments; device file cache and share/open services are available.		
Verification Steps	Open proposal details; select each attachment; inspect the API download request, local cache file, filename and MIME type; open the file; test unavailable and unauthorized attachments.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Attachment Metadata	View the proposal attachment list	Filename, type, size, and description match server metadata	Attachment metadata displayed correctly	PASSED
Authorized Download API	Tap Download / Open for an allowed attachment	Authenticated request downloads the correct attachment bytes	Attachment downloaded correctly	PASSED
Device File Cache	Inspect the generated local attachment file	File uses a safe unique filename and contains the complete response data	Cache file created correctly	PASSED
Operating System Open / Share	Open the downloaded file from the mobile app	Device dialog receives the local URI and correct MIME type	File opened through the device correctly	PASSED
Attachment Authorization Errors	Request a missing or unauthorized attachment	API status is translated into a clear error and the review screen remains usable	Attachment error handled correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-12	User / Access Type	Authorized Activity Proposal Approver
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Review notifications exist across multiple pages with read, unread, linked, and legacy unlinked records.		
Verification Steps	Open Review Notifications; compare API metadata; open an unread linked item; return and load more; mark all read; verify the same read state in the web system.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Notification List API	Load the first and next pages of review notifications	Items, pagination, and total counts match the API response without duplicates	Notification pages loaded correctly	PASSED
Unread Count	Compare Home badge, notification heading, and server count	All unread indicators show the same value	Unread counts synchronized correctly	PASSED
Notification Read State	Open one unread notification	Item is marked read through the API and the unread count decreases	Read state updated correctly	PASSED
Proposal Navigation	Tap a linked notification	Mobile app opens the Activity Proposal referenced by the notification	Correct proposal opened	PASSED
Mark All Read	Tap Mark all read and verify from mobile and web	All review notifications become read in both clients	All read states synchronized correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-13	User / Access Type	Authorized Approver on a Push-Enabled Device Build
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Push notifications are enabled; Expo project ID and platform credentials are configured; device grants notification permission.		
Verification Steps	Sign in on a physical device; allow notifications; inspect backend push-token record; trigger a proposal hand-off; receive and tap the push while active and after closing the app; sign out.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Push Permission and Expo Token	Grant device notification permission after approver login	App obtains an Expo push token for the configured EAS project	Expo push token obtained correctly	PASSED
Backend Device Registration	Inspect the mobile push-token API record	Token, stable device ID, platform, and device name are stored for the user	Device registration stored correctly	PASSED
Foreground Push Handling	Trigger a proposal notification while the app is active	Notification is shown and mobile notification count/list refreshes	Foreground notification handled correctly	PASSED
Push Deep Link	Tap a proposal push from background and closed states	After session and navigation initialization, the referenced proposal opens and notification is marked read	Push opened the correct proposal	PASSED
Push Token Logout Cleanup	Sign out and inspect backend and secure storage	Device token registration is deleted and stored Expo token is removed	Push token removed correctly	PASSED

INTEGRATION TEST DOCUMENT		Application / System Name	SDAO-DMS (Paperless Document Management System)
Test Cycle No.	TC-14	User / Access Type	Authorized Activity Proposal Approver
Date Tested	10/08/26	Type of System	Mobile Application
Pre-conditions	Valid and expired sessions can be simulated; the same proposal can be updated from the web system while open on mobile.		
Verification Steps	Restore a valid session; expire the token and refresh; reopen the proposal; advance it from the web system; attempt a mobile action; disconnect and reconnect the network; retry.		

Modules	Action Descriptions	Expected Results	Actual Results	Remarks
Valid Session Restore	Reopen the mobile app with a valid stored token	User endpoint validates the token and approver workspace opens	Valid session restored correctly	PASSED
Expired Session Recovery	Refresh data with an expired or revoked token	HTTP 401 clears the local session and returns the user to Sign in	Expired session cleared correctly	PASSED
Concurrent Workflow Protection	Attempt a mobile action after another client advances the proposal	API rejects the stale action and mobile reloads the current proposal state	Stale action blocked and state refreshed	PASSED
Cross-Client Consistency	Compare proposal state in mobile and web after the refresh	Both clients show the same stage, status, permissions, and history	Cross-client state matched correctly	PASSED
Network Error Recovery	Refresh while offline, reconnect, and use retry or pull-to-refresh	Readable error appears while offline and current data loads after reconnection	Network recovery completed correctly	PASSED
